The Newsletter of the Irrigation Association of New Jersey

Vol. 17 No. 1 April 2015

## President's Message

I am extremely honored and privileged to be your President of the Irrigation Association of New Jersey for 2015. I pledge to you, the members, that I will do my utmost to lead and improve your organization.

I would like to express my gratitude to Mike Edmiston for his great leadership and direction during his term as President. Also, a huge Thank You to Wade Slover for his tireless work as a member of the Board of Trustees for the last nine years. Gentlemen, Thank you.

Welcome to Paul Garris, Atlantic Irrigation, to the Board of Trustees. Paul will be serving as Treasurer of IANJ for the coming year.

My goal for 2015 is to make our organization better than I found it. We will continue to improve our educational offerings, not only to earn CEC's, but to improve the knowledge and professionalism in our industry. We will be

*We should start planning our "Smart Irrigation Month" advertising information now for timely delivery to our clients. Information on Smart Irrigation Month" can be found on the Irrigation Association WEB site, [www.irrigation.org](http://www.irrigation.org).*

working with our Lobbyist, MBI GluckShaw, to insure a smooth transition of the Landscape Irrigation Contractors Examining Board (LICEB) from the Department of Environmental Protection to the Department of Community Affairs. We are also working in concert with LICEB to insure the authenticity of earned CEC's by creating a tracking system for Irrigation Courses offered by IANJ as well as other venues.

Education for us, as contractors, is important to keep our skills and knowledge up to date with current technology and regulatory issues. We, as contractors, have an obligation to keep our clients informed of the advances in our industry. Our Lobbyist, MBI GluckShaw, is in the process of having Governor Christy proclaim July 2015 as "Smart Irrigation Month". We should take this opportunity to inform our clients of the proclamation and of the new technologies that we have available to promote water conservation. Simple items as insuring each system has at least a basic rain sensor installed will substantially reduce water consumption. The advances in Smart Controller technology including ET based systems will benefit water conservation efforts as well. We should start planning our "Smart Irrigation Month" advertising information now for timely delivery to our clients. Information on Smart Irrigation Month" can be found on the Irrigation Association

## President's Message

Continued from page 1

website, [www.irrigation.org](http://www.irrigation.org). I would encourage every Licensed Irrigation Contractor in New Jersey to become an EPA Water Sense Partner. Information can be found at [www.epa.gov/watersense](http://www.epa.gov/watersense). Links to both of these WEB sites are on the IANJ WEB site.

Included in the recently enacted legislation requiring Licensed Irrigation Contractors in New Jersey to earn CEC's to renew their Licenses is the **REQUIREMENT** for all companies in New Jersey performing irrigation work obtain an Landscape Irrigation Contractor Business Permit (LICBP). There is no charge for the permit and only takes about five minutes to complete the form. A copy of the permit can be obtained using the link on the IANJ website Home Page, [www.ianj.com](http://www.ianj.com). The LICBP number issued to each contractor must be displayed on all vehicles, included on all correspondence, contracts, advertising, websites, business cards, etc. If you have not obtained your LICBP, please do so before the 2015 season starts.

In the near future you will be receiving information about the IANJ Summer TECH offerings and the Annual Golf Outing. Your continued support is encouraged and appreciated.

Thank you again and have a safe and prosperous 2015 season.

*Roy D. Nau, CIC, CID, CLIA  
President, IANJ*

# Winter Tech Conference 2015

The 2015 IANJ Winter Tech Conference was held earlier this year from January 19-22 at the Crowne Plaza Hotel, Jamesburg, NJ to accommodate irrigation contractors in need of continuing education credits for their 2015 license renewals. Over 250 contractor members attended the week of classes which included a membership reception and special water conservation classes.

There were **six new seminars** added to the schedule this year, with **five classes in water conservation**. A total of 16 classes with over 60 available CECs were offered to irrigation contractors. Classes were presented according to four tracks: Business, Maintenance, Design, and Electives and NEWWA also presented a Backflow Re-Certification Class with 25 contractors able to be re-certified.

Our thanks to all our supplier exhibitors who participated in the Trade Show on January 20 and to those members who generously supported the IPAC Matching Funds Campaign. We would also like to thank our instructors who give their time and expertise each year so that IANJ can present Winter Tech.

See additional photos on page 5.

# Reduction of Lead in Drinking Water Act

The “Safe Water Drinking Act (SWDA), Section 1417”, was amended by the “Reduction of Lead in Drinking Water Act” effective January 4, 2014. The amendments require that the lead content of pipes, fittings and fixtures be less than 0.25% by weight.

The “Reduction of Lead in Drinking Water Act” specifically exempts systems used for irrigation from the new requirements. The backflow prevention device is exempt from the lead free requirements. The main supply shut off valve to the irrigation system is not exempt. The water in the pipe between the main supply shut off valve and the backflow prevention device is considered potable water.

Any water discharge from an irrigation system down-

stream of the backflow prevention device is considered non-potable water and is not anticipated to be used for human consumption. If an irrigation system is installed with a live main or separate zone to supply downstream faucets, wash stations, etc., these items should be labeled as non-potable water and not safe for human consumption.

The “Summary of the Reduction of Lead in Drinking Water Act” can be found at [www.water.epa.gov/drink/info/lead/upload/epa815s13001.pdf](http://www.water.epa.gov/drink/info/lead/upload/epa815s13001.pdf). The section exempting irrigation including backflow prevention devices from the revised requirements is “Summary of the Amendments to the SWDA Section 1417”, Para. (2).

# Reminder – July Is Smart Irrigation Month

July is traditionally the month of peak demand for watering lawns, gardens and landscapes in North America. The Irrigation Association named July as Smart Irrigation Month to increase public awareness about simple practices and innovative technologies homeowners, businesses and property managers can use to:

- Save money on utility bills.
- Minimize or defer investments in infrastructure to store and carry water, typically paid for by property taxes or municipal bonds.
- Protect their community's water supply for generations to come.

Homeowners typically overwater lawns and landscapes by up to 30 percent. By selecting and planting carefully, watering wisely, and maintaining and upgrading automated irrigation systems, consumers can save money, save water and see better results.

IANJ is once again seeking Governor Christie's designation of July as Smart Irrigation Month in New

*By selecting and planting carefully, watering wisely, and maintaining and upgrading automated irrigation systems, consumers can save money, save water and see better results.*

Jersey. "Many of our irrigation contractors, suppliers, and manufacturers are seriously involved in helping local communities and consumers use water efficiently and effectively," said Roy Nau, President of the Irrigation Association of New Jersey, and we value this recognition of what our industry does toward water conservation."

# 4Th Annual IANJ/NJCLA Golf Challenge

Tuesday, September 15th  
Jumping Brook Country Club  
210 Jumping Brook Rd.  
Neptune, NJ

## *MARK YOUR CALENDARS*

**T**he 4th Annual IANJ/NJLCA Golf Challenge will be held September 15th at a **NEW** location – Jumping Brook Country Club in Neptune (Exit 100 off the Garden State Parkway). Last year 120 golfers came out for the event and this newly refurbished course and clubhouse is welcoming us and we will be golfing in support of both the IANJ and NJLCA Scholarship Funds. More of that to come!

We're hoping more of our Central and South Jersey members will come out and play in this great event. We have many opportunities for **SUPPLIERS AND MANUFACTURERS** to be in front of the IANJ and NJLCA memberships (we're on target for a full field of 144!). It's first come, first served so don't miss out!

WE TAKE YOUR BUSINESS PERSONALLY!

# Delivering The Best In Health Benefits!

All employers are aware of the ever increasing cost of providing health benefits to your employees. IANJ has worked to provide you a tool to help manage these costs with it's partnership with Association Master Trust (AMT).

Association Master Trust is a unique not-for-profit benefits trust formed to serve the health coverage needs of participating association employer members, and has been doing so for over 30 years. AMT offers a full menu of "cutting edge" benefit plans available to meet your specific needs and currently contracts with Horizon **Blue Cross Blue Shield of NJ** to provide AMT members with access to Horizon's outstanding network of hospitals and doctors in New Jersey.

While many Americans are currently exploring new options in health care coverage, your best choice may be right here... through the IANJ Benefits Trust and AMT. Great rates, great coverage and a health benefit plan run by members for members.

*Association Master Trust*

# IANJ Movie Review

**Title:** *Insurgent*

**Director:** Robert Schwentke

**Cast:** Kate Winslet, Jai Courtney, Mekhi Phifer, Shailene Woodley, Theo James & Ansel Elgort

**A**fter a shaky opening, *The Divergent Series*, as the movie franchise based on Veronica Roth's YA novel trilogy is now officially called, offers a more cohesive and involving second installment with *Insurgent*. In part, the improvement is a function of storytelling logistics having defined the rules of its dystopian future world in last year's *Divergent*, the saga is considerably less encumbered by exposition and setup. Shailene Woodley's Tris Prior, the reluctant chosen one at the center of the post apocalyptic thriller, is on the run, and there's narrative momentum in pure kinetics.

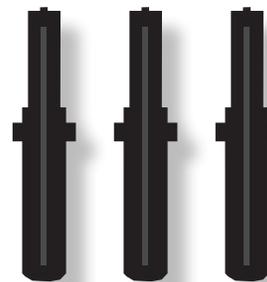

Even with breathless chases, strong design components and dazzling effects, the story's organizing principle — the faction system that divides society into five groups based on personality — grows less compelling as *Insurgent* proceeds. The MacGuffin that spurs the action, a mystery box that only Tris can unlock containing a message about said system, is a handsome objet d'art with blinking blue lights, its big reveal dutifully setting up the next sequel while casting the story's defining metaphor in doubt.

Beginning with a bracing race through woods, the movie picks up where *Divergent* left off, in the aftermath of a war against Abnegation, the selfless faction in which Tris grew up. Targeted for her gifts as a category-defying Divergent by villainous Erudite leader Jeanine (Kate Winslet), Tris is a fugitive on the run with her boyfriend, Four (Theo James), a fellow Divergent; her seemingly timid brother, Caleb (Ansel Elgort); and frenemy Peter. The latter character's Machiavellian maneuvers enliven the story with something close to intrigue; playing him with a wise swagger, Teller injects the glum doings with jolts of sarcastic energy.

The scene arrives at the end when Tris has to undergo a series of five "sims"—hallucinatory simulations that test her ability to puzzle her way out of tight situations and test our ability to know what is real and what is fake onscreen. The most memorable is when Tris must engage in a struggle with herself, which ultimately allows her to achieve self-forgiveness. In the end, the stage is set for Tris to lead the charge and save the world as the third book, "*Allegiant*," is split into two films. Much like Woodley herself almost singlehandedly saves these films from being just another overwrought dystopian nightmare.

# Everyone Drives Revenue

By Bruce Wilson  
Landscape Management

Everyone drives revenue. If you don't agree, it's time to change the way you think about marketing – not in the functional context of creating demand for your services, but in the sense of how you view your organization.

Let's look at Apple. Apple is a manufacturer. But most of us who buy or use Apple products think of the company as a marketing powerhouse. That's because everyone who is affiliated with the organization seems engaged in selling it. From its developers and engineers to its retail staff, everyone is committed to providing a world-class customer experience.

Becoming a market-driven organization requires every employee, regardless of function, to focus on creating value for the customer and growing revenue. Directly or indirectly, everyone needs to move the brand forward. Here's the problem: Marketing as a strategic function is often the first budget to get cut, especially when times are tough. And because marketing and sales are interrelated, cutting marketing and its processes often can result in leaving salespeople on their own, caving in to the low-price bidding war. Looking at it another way, keeping sales and eliminating marketing is like keeping the tactic and eliminating the strategy.

Companies ask me, how do I grow sales? The answer is, not without strategy. And for that you need the strategic value marketing brings and you need all employees to engage in the spirit, if not the act, of promoting your company, understanding and knowing what their roles are in driving revenue and meeting profitability goals.

To be successful in a world where technology has given customers greater control and access to more data than ever before, coordinating interdepartmental resources to create customer value will help your company become an organization where everyone is connected to the customer and involved in profitable growth.

It used to be that you went out and found customers. Now customers are finding you. Are you reorienting your company so they can?

Here are 10 ways to get started:

1. Link your marketing, sales and operations efforts to grow profitably. Align goals interdepartmentally.
2. Recognize that every employee drives revenue and reputation and participates in creating a first-class service experience. Tell your employees how they affect growth.
3. Hire employees with sales in mind. How will these

people represent you to the public? How will they contribute to achieving positive results? Remember, the team on the loading dock is the face of your company to the vendor; the courtesy of the receptionist is the sound of your company to the caller.

4. Have employees participate on sales support teams or send representatives from different departments to sales meetings. Understanding sales and growth goals empowers everyone to pitch in.
5. Make sure employees understand the mission, vision, and objectives of the company; it's a service and its target audience.
6. Communicate across discipline. Make sure your employees understand how other departments work and encourage them to find ways they can work together.
7. Define jobs in the context of how the roles and responsibilities help the company grow. Measure the bottom-line consequences.
8. Train for growth. Encourage employees to grow their specific skills in a way that will enhance company growth.
9. Use your entire team as a bucket brigade. Don't delegate the responsibility for selling and branding to a bucket of one.
10. Information is the first step to engagement. Have town hall meetings to discuss how the company is doing. Don't leave anyone out. Inspiration comes from unexpected sources.

# Legislative Report from Tim Martin

212 West State Street · Trenton, NJ 08608 ☎ Tel: 609/392-3100 · Fax: 609/392-6347

## Governor Returns DCA Transfer Legislation with Recommendations

Governor Christie last month conditionally vetoed S-2234, legislation that would transfer the licensure and regulation of irrigation contractors from the Department of Environmental Protection to the Department of Community Affairs. The conditional veto—which allows the Governor to ask the legislature for essentially a “do-over”—came with recommended amendments that would eliminate language that could potentially disrupt the LICEB’s regulations and authority during transition. It also pushes the effective date out to six months after enactment, rather than July 1 of this year.

IANJ would like to thank Governor’s Counsel which did a spectacular job reaching out to us and keeping us in the loop. They also cared very much about what the Association wanted to accomplish. We remain hopeful that the Senate and Assembly, each of which have several opportunities to accept the recommendations, swiftly pass the revised bill before the summer recess, allowing for a January 2016 transition.

## Please take a moment to read the Governor’s comments, below:

“This bill intends to move a board charged with overseeing landscape irrigation contractors from the Department of Environmental Protection to the Department of Community Affairs. It further seeks to rename the board. I have no objection to the goals of this legislation. Unfortunately, however, the bill could cause significant disruption for landscape irrigation contractors and consumers. As drafted, the bill would immediately dissolve the existing board. While the bill creates a new board to replace the one being dissolved, appointing board members is not an instantaneous process, especially when the appointments require the advice and consent of the Senate, as is the case here. Separately, the bill would immediately void the existing board’s regulations. Although the bill contemplates the promulgation of new regulations, under the Administrative Procedure Act, proposing and adopting new regulations can take many months. The bill would therefore leave landscape irrigation contractors without an oversight board and without regulations for an indeterminate period of time. I do not believe the Legislature intended the bill to function in this manner. Rather, I believe that the Legisla-

ture sought only to rename the existing board and transfer responsibility for it from the Department of Environmental Protection to the Department of Community Affairs. My recommendations would accomplish these ends.”

# Non-certified contractors can be reported

In an effort to provide enforcement to the New Jersey Landscape Irrigation Contractors Certification Act, N.J.S.A. 45AA-1, the Irrigation Association of New Jersey has received a copy (through the New Jersey License Examining Board) of a Contractor Certification Verification form. This form may be used by Certified Irrigation Contractors to give the Examining Board the names of contractors they observe to be operating without the required certification. **ALL FORMS MUST BE FILLED OUT COMPLETELY OR THEY WILL BE RETURNED..**

**New Jersey Landscape Irrigation Contractor Examining Board  
Department of Environmental Protection  
Bureau of Revenue  
CN 417, Trenton, NJ 08625-0417**

Gentlemen:

I have observed the below named contractor installing a landscape irrigation system. I request that the New Jersey Landscape Irrigation Contractor Examining Board verify that the contractor has obtained certification pursuant to Landscape Irrigation Contractor Certification Act, N.J.S.A. 45AA-1.

Date of Inquiry: \_\_\_\_\_

Name of Contractor Firm in Question: \_\_\_\_\_

Address: \_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_
